PART I

ITEM 1. BUSINESS

GENERAL

G-III Apparel Group, Ltd. (the "Company") designs, manufactures, imports and markets an extensive range of leather and non-leather apparel including coats, jackets, pants, skirts and other sportswear items under its "G-III"™, "Siena"™, "Siena Studio"™ and "Colebrook and Co."™ labels, under private retail and licensed labels. The Company commenced operations in 1974, initially selling moderately priced women's leather coats and jackets under its G-III label. The Company has continuously expanded its product lines and began selling higher priced, more fashion oriented women's leather apparel under its Siena and "Cayenne"™ (now called Siena Studio) labels in 1981 and 1988, respectively. In 1988, the Company introduced a line of men's leather apparel, presently consisting primarily of jackets and coats sold under the G-III label. In 1990, the Company formed a textile division, which designs, imports and markets a moderately priced line of women's textile outerwear and sportswear under the J.L. Colebrook label. The Company replaced the Cayenne label with the Siena Studio label for its mid-priced line of women's leather apparel during 1991 and introduced a men's textile apparel line in the fall of 1992.

The Company believes that the sale of licensed products will help it to expand its business. In 1993, the Company entered into a licensing agreement with NFL Properties to market a line of outerwear apparel with NFL team logos. In 1995, the Company entered into a licensing agreement with Kenneth Cole Productions to design and market a line of women's leather and woven outerwear under the Kenneth Cole label. In 1996, the Company entered into an agreement with the National Hockey League to market a line of outerwear apparel with the NHL team logos. In February 1997, the Company formed a joint venture with Black Entertainment Television, Inc. to produce a BET-branded clothing and accessory line.

Sales of moderately priced women's leather apparel accounted for approximately 34% of the Company's net sales in the fiscal year ended January 31, 1997, compared to 44% in the fiscal year ended January 31, 1996. The Company sells to approximately 2,300 customers, including nationwide chains of department and specialty retail stores, price clubs and individual specialty boutiques.

During 1996, the Company continued the implementation of its restructuring program started in 1994 which was intended to strengthen the Company's core product lines, improve long-term profitability and enhance shareholder value. In 1996, the Company consolidated merchandise divisions, reduced inventory, decreased borrowing levels and sub-leased one of its warehouses to a third party, thereby consolidating its warehouse operations into one location and reducing its warehouse and distribution costs.

In the fiscal year ended January 31, 1997, substantially all the Company's products were manufactured for the Company by foreign independent contractors, located principally in South Korea, China and Indonesia and, to a lesser extent, in India, Philippines and Hong Kong. The Company manufactures certain products at its wholly-owned factory in Indonesia and its partially-owned factory in Northern China.

A select number of garments were also manufactured for the Company by independent contractors located in the New York City area.

References to the Company include the operations of all the Company's subsidiaries.

PRODUCTS - DEVELOPMENT AND DESIGN

The Company manufactures and markets a full line of women's leather apparel in "junior," "missy," and "half sizes" and an outerwear line of men's leather apparel at a wide range of retail sales prices. The Company's product offerings also include textile outerwear, woolen coats, raincoats and sportswear.

The G-III line of women's apparel consists of moderately priced women's leather apparel, which typically sells at retail prices from \$30 for sportswear items to \$400 for coats. The Siena Collection, which caters to the higher priced, designer market, typically has retail prices from \$300 for sportswear items to \$1,000 for coats. Siena Studio, the Company's bridge-priced line of women's leather apparel, primarily consists of jackets and skirts with retail prices from \$100 for skirts to \$600 for outerwear. Products in the men's line of leather outerwear, sold under the G-III label, typically have retail prices between \$40 and \$400. The moderately priced line of women's textile outerwear and sportswear, sold under the Colebrook & Co. label, has retail prices in the range of \$50 to \$130. The men's textile apparel line, consisting of moderately priced outerwear, has retail prices ranging from \$25 to \$175. The moderately priced line of women's coats, sold under the Vision label, has retail prices in the range of \$100 to \$200.

The Company works with retail chains in developing product lines sold under private retail labels. With regard to private label sales, the Company meets frequently with buyers who custom order products by color, fabric and style. These buyers may provide samples to the Company or may select styles already available in the Company's showrooms. The Company has established a reputation among such buyers for the ability to arrange for manufacture of apparel on a reliable, expeditious and cost-effective basis.

The Company's in-house designers are responsible for the design and look of the Company's products. The Company responds to style changes in the apparel industry by maintaining a continuous program of style, color and type of leather and fabric selection. In designing new products and styles, the Company attempts to incorporate current trends and consumer preferences in the Company's traditional product offerings. The Company seeks to design products in response to anticipated trends in consumer preferences, rather than to attempt to establish market trends and styles.

Design personnel meet regularly with the Company's sales and merchandising departments to review market trends, sales results and the popularity of the Company's latest products. In addition, representatives of the Company regularly attend trade and fashion shows and shop at fashion forward stores in the United States, Europe and the Far East, and present sample items to the Company along with their evaluation of the styles expected to be in demand in the United States. The Company also seeks input from selected customers with respect to product design. The

Company believes that its sensitivity to the needs of its retail customers, coupled with the flexibility of its production capabilities and its continual monitoring of the retail market, enables the Company to modify designs and order specifications in a timely fashion.

The Company's arrangements with selected overseas factories for textile apparel enables it to conduct test-marketing, in cooperation with specialty retailers and department stores, prior to full manufacturing and marketplace introduction of certain styles and products. Testmarketing typically involves introducing a new style into approximately 20 to 30 store locations in

certain major markets. If the Company finds acceptance of the product on a consumer level, the Company proceeds with full-scale manufacturing and market introduction.

LEATHER APPAREL

MANUFACTURING

Substantially all the Company's products are imported from independent manufacturers located primarily in South Korea, Indonesia and China and, to a lesser extent, in India, the Philippines and Hong Kong. The Company manufactures certain products at its wholly-owned factory in Indonesia and its partially-owned factory in Northern China. A selected number of garments are also manufactured for the Company by independent contractors located in the New York City area.

The Company has a branch office in Seoul, South Korea, which acts as a liaison between the Company and the various manufacturers located throughout South Korea, Indonesia and China used to produce the Company's leather and woven garments. Upon receipt from the Company's headquarters of production orders stating the number, quality and types of garments needed to be produced, this liaison office negotiates and places orders with one or more South Korean, Indonesian and Chinese manufacturers. In allocating production among independent suppliers, the Company considers a number of criteria, including quality, availability of production capacity, pricing and ability to meet changing production requirements. At January 31, 1997, the South Korean office employed 15 persons.

In connection with the foreign manufacture of the Company's leather apparel, manufacturers purchase skins and necessary "submaterials" (such as linings, zippers, buttons and trimmings) according to parameters specified by the Company. Prior to commencing the manufacture of garments, samples of the skins and submaterials are sent to the South Korean liaison office and the Company's New York offices for approval. Employees of the liaison office regularly inspect and supervise the manufacture of the products for the Company in order to ensure timely delivery, maintain quality control, monitor compliance with Company manufacturing specifications and inspect finished apparel.

Because of the nature of leather skins, the manufacture of leather apparel is performed manually. A pattern is used in cutting hides to panels which are assembled in the factory. All submaterials are also added at this time. Products are inspected throughout this process to insure that design and quality specifications of the order, as provided by the Company, are being maintained as the garment is assembled. After pressing, cleaning and final inspection, the garment is labeled and hung awaiting

-4-

shipment. A final random inspection occurs when the garments are packed for shipment.

The Company arranges for the production of apparel on a purchase order basis, with each order to a foreign manufacturer generally backed by an irrevocable international letter of credit. Substantially all letters of credit arranged by the Company require as a condition of release of funds to the manufacturer, among others, that an inspection certificate be signed by a representative of the Company. Accordingly, if an order is not filled by a foreign manufacturer, the letter of credit is not paid and the Company does not bear the risk of liability for the goods being manufactured. The Company assumes the risk of loss on an F.O.B. basis when goods are delivered to a shipper and is insured against casualty losses arising during shipping.

As is customary in the leather industry, the Company has not entered into any long-term contractual arrangement with any contractor or manufacturer. In order to provide for more efficient communications and

operations with certain of the larger leather apparel manufacturers, in addition to utilizing its South Korean branch office, the Company has historically placed orders for leather apparel with two of its largest manufacturers through an established buying agent located in New York City. The buying agent, under the supervision of Company personnel located in the United States and South Korea, is responsible for procuring sufficient contract production capacity from these manufacturers to meet the forecasted demand for the Company's products. For the fiscal years ended January 31, 1995, 1996 and 1997, approximately 16%, 13% and 11%, respectively, of the Company's products were produced by manufacturers working through the Company's buying agent. The Company believes that the production capacity of foreign manufacturers with which it has developed or is developing a relationship is adequate to meet the Company's leather apparel production requirements for the foreseeable future. The Company believes that alternative foreign leather apparel manufacturers are readily available and that the loss of any manufacturer or the buying agent would not materially adversely affect the Company's operations.

The Company's arrangements with foreign manufacturers of its apparel are subject to the usual risks of doing business abroad, including currency fluctuations, political instability and potential import restrictions. Although the Company's operations have not been materially affected by any of such factors to date, due to the significant portion of the Company's garments which are produced abroad, any substantial disruption of its relationships with foreign manufacturers could adversely affect the Company's operations. In addition, since the Company negotiates its purchase orders with its foreign manufacturers in United States dollars, if the value of the United States dollar against local currencies was to go down, these manufacturers might increase the United States dollar prices charged to the Company for products. Virtually all the Company's imported leather products and raw materials are subject to United States Customs duties of approximately 6%.

A majority of all finished goods manufactured abroad are shipped to the Company's New Jersey warehouse and distribution facility for final inspection and allocation and reshipment to customers. The goods are delivered to the Company and its customers by independent shippers, choosing the form of shipment (principally ship, truck or air) based upon a customer's needs and cost and time considerations.

-5-

MARKETING AND DISTRIBUTION

The Company's products are sold primarily to department, specialty and mass merchant retail stores in the United States. The Company sells to approximately 2,300 customers, ranging from national and regional chains of specialty retail and department stores, whose annual purchases from the Company exceed \$1,000,000, to small specialty stores whose annual purchases from the Company are less than \$1,000. In the fiscal year ended January 31, 1997, the Sam's Club and Wal-Mart divisions of Wal-Mart Stores, Inc. accounted for an aggregate of 12.8% of the Company's net sales. No customer accounted for more than 10% of the Company's net sales in the fiscal years ended January 31, 1995 or 1996.

Almost all of the Company's sales to date have been made in the United States. The Company has also marketed its products in Canada and Mexico.

Retail sales of outerwear apparel have traditionally been seasonal in nature. Although the Company sells its apparel products throughout the year, net sales in the months of July through November accounted for approximately 68% and 78% of Company net sales during the fiscal years ended January 31, 1996 and 1997, respectively. The July through November time frame is expected to continue to provide a disproportionate amount of the Company's net sales.

Along with the Company's foreign offices, the Company's trading company subsidiary, Global International Trading Company, located in Seoul, Korea, assists in providing services to the Company's customers. As of January 31, 1997, Global International Trading Company employed 22 persons.

The Company's products are sold primarily through a direct employee sales force which consisted of 25 employees as of January 31, 1997. The Company's principal executives are also actively involved in sales of its products. A limited amount of the Company's products are also sold by various retail buying offices located throughout the country. Final authorization of all sales of products is solely through the Company's New York showroom, enabling the Company's management to deal directly with, and be readily accessible to, major customers, as well as to control more effectively the Company's selling operations.

The Company primarily relies on its reputation and relationships in the industry to generate business. The Company believes it has developed a significant customer following and positive reputation in the industry, as a result of, among other things, standards of quality control, on-time delivery, competitive pricing and willingness and ability to assist customers in their merchandising of the Company's products. In addition, the Company has, to a limited extent, advertised its products and engaged in cooperative ad programs with retailers. The Company believes it has developed brand awareness, despite the absence of general advertising, primarily through its reputation, consumer acceptance and the fashion press.

The Company opened its first retail outlet store in Secaucus, New Jersey in December 1990 and opened six additional outlet stores in fiscal 1994 and 1995. The outlet stores were intended to assist the Company in determining sales trends of various styles, colors and skin and fabric types and enable the Company to sell damaged merchandise which could not be resold at regular prices. The Company decided to

-6-

discontinue operations at certain locations and closed three stores during fiscal 1997. No additional stores are planned to be opened during fiscal 1998. There was no material affect on the financial statements or operations of the Company as a result of implementing these actions.

RAW MATERIALS

Most products manufactured for the Company are purchased by the Company on a finished goods basis. Raw materials used in the production of the Company's leather apparel are available from numerous sources and are in adequate supply. The Company is not aware of any manufacturer of the Company's apparel not being able to satisfy its requirements for any such raw materials due to an inadequacy of supply.

The leather apparel industry competes with manufacturers of other leather products for the supply of leather. Leather skins are a byproduct. Accordingly, raw material costs are impacted by changes in meat consumption worldwide as well as by the popularity of leather products.

TEXTILE APPAREL

The Company also produces outerwear from a variety of textiles such as wools, cottons and synthetic blends, suitable for leisure and active wear. The Company designs, imports and markets a moderately priced line of women's textile outerwear and sportswear under the Colebrook & Co. label. The Coat Division markets moderately priced women's woolen coats and raincoats, sold under the Vision label. The men's textile apparel line consists of moderately priced outerwear.

The Company's development and design process as well as its

marketing and distribution strategies for textile apparel are similar to those employed for its leather apparel. See "Products-Development and Design" and "Leather Apparel -- Marketing and Distribution" of this Item 1 above. Textile outerwear is manufactured for the Company by several independent contractors located primarily in the Far East and, to a lesser extent, domestically. Manufacturers produce finished garments in accordance with production samples approved by the Company and obtain necessary quota allocations and other requisite customs clearances.

To facilitate better service for the Company's textile and leather apparel customers and accommodate and control the volume of manufacturing in the Far East, the Company has an office in Hong Kong. Similar to the Seoul office, the Hong Kong office acts as a liaison between the Company and the various manufacturers of textile and leather apparel located in Hong Kong and China. The Company utilizes its domestic and Hong Kong office employees to monitor production at each manufacturer's facility to ensure quality control, compliance with the Company's specifications and timely delivery of finished garments to the Company's distribution facilities or customers. The Hong Kong office employed 12 persons as of January 31, 1997.

-7-

The Company's arrangements with its textile manufacturers and suppliers are subject to the risks attendant to doing business abroad, including the availability of quota and other requisite customs clearances for textile apparel, the imposition of export duties, political and social instability and currency fluctuations. United States customs duties on the Company's textile apparel presently range from 5% to 30%, depending upon the type of fabric used and how the garment is constructed. The Company monitors duty, tariff and quota-related developments and seeks to minimize its potential exposure to quota-related risks through, among other measures, geographical diversification of its manufacturing sources and shifts of production among countries and manufacturers.

LICENSING

The Company believes that the sale of licensed products will help it to expand its business. The Company presently has license agreements with Kenneth Cole Productions, National Football League Properties, National Hockey League Properties Inc., NASCAR and several universities located in the United States. The Company plans to seek other opportunities to enter into trademark license agreements in order to expand its product offerings under nationally recognized labels.

In February 1997, the Company formed a joint venture with Black Entertainment Television, Inc. to produce a BET-branded clothing and accessory line. BET Holdings Inc. has granted a ten year exclusive license to the joint venture for the manufacture and distribution of women's, men's and children, apparel and accessories utilizing "BET," "Black Entertainment Television" and other BET-related marks. The product line will be targeted to the African-American and urban consumer market.

BACKLOG

A significant portion of the Company's orders are short-term purchase orders from customers who place orders on an as-needed basis. The amount of unfilled orders at any time has not been indicative of future sales. Information relative to open purchase orders at any date may also be materially affected by, among other things, the timing of the initial showing of apparel to the trade, as well as by the timing of recording of orders and shipments. As a result, the Company does not believe that the amount of its unfilled customer orders at any time is meaningful.

TRADEMARKS

Several trademarks have been granted federal trademark protection through registration with the U.S. Patent and Trademark Office, including for G-III, Avalanche, J.L. Colebrook, Laura Renee, Laura Jeffries, Colebrook Kids, Urban Cowboy, Cayenne, G-III Outerwear Company Store, JLC (& design), JLC Outerwear (& design), J.L.C. (& design), and Last Resort. The Company has applications for several additional registrations pending before the U.S. Patent and Trademark Office.

The Company has been granted trademark protection for G-III in France, Canada and Mexico and for J.L. Colebrook in Germany, Canada, Mexico, France, Great

-8-

Britain and Benelux. The Company also has several additional registrations pending in the European Community and Canada.

Although the Company regards its trademarks as valuable assets and intends to vigorously enforce its trademark rights, the Company does not believe that any failure to obtain federal trademark registrations for which it has applied would have a material adverse effect on the Company.

COMPETITION

The apparel business is highly competitive. The Company has numerous competitors with respect to the sale of leather and textile apparel, including distributors that import leather apparel from abroad and domestic retailers with established foreign manufacturing capabilities. Sales of the Company's products are affected by style, price, quality and general fashion trends. The Company may also be deemed to compete with vertically-integrated apparel manufacturers that also own retail stores. In addition, the Company competes for supplies of raw materials and manufacturing and tanning capacity.

EMPLOYEES

As of January 31, 1997, the Company had 239 full-time employees, of whom 73 worked in executive, administrative or clerical capacities, 79 worked in design and manufacturing, 47 worked in warehouse facilities, 25 worked in sales and 15 worked in the retail outlet division. The Company employs both union and non-union personnel and believes that the Company's relations with its employees are good. The Company has not experienced any interruption of any of its operations due to a labor disagreement with its employees.

The Company is a party to an agreement with the Amalgamated Clothing and Textile Workers Union (the "Union"), covering approximately 39 full-time employees as of January 31, 1997. This agreement, which is currently in effect through October 30, 1999, automatically renews on an annual basis thereafter unless terminated by the Company or the Union prior to August 30 of that year.

ITEM 2. PROPERTIES

The Company's executive offices and office support departments are located in a five story 32,000 square foot building at 345 West 37th Street in New York City. This property is leased pursuant to a sublease from a corporation owned by Morris Goldfarb and Aron Goldfarb, the Company's President and Chairman of the Board, respectively, for which the Company pays rent monthly, plus real estate taxes. For the fiscal years ended January 31, 1996 and 1997, the total payments for the premises were approximately \$327,000 and \$325,000, respectively.

The Company's sales showrooms and support staff are located at 512 Seventh Avenue, which is one of the leading outerwear apparel buildings in New York City. The Company leases an aggregate of approximately 31,800 square feet in this building through January 31, 2003 at a current aggregate annual rental of approximately \$486,000.

The Company's warehouse and distribution facility, located in Secaucus, New Jersey, contains approximately 107,000 square feet, plus a 3,000 square foot retail outlet store. This facility is leased through March, 2000 at an annual rent of approximately \$482,000. The lease provides for two option renewal terms of five years each with rental for the renewal term based on

market rates. A majority of the Company's finished goods are shipped to the New Jersey distribution facilities for final reshipment to customers.

In March 1996, the Company subleased its other warehouse and distribution facility in Secaucus, New Jersey to an unaffiliated third party and consolidated all of its warehouse and distribution operations at one location. The sublease is co-extensive with the lease term, which extends through March 2000, although the sub-lessee has the right to terminate the sub-lease at any time on six months notice. The sub-lease, provides for the sub-lessee to pay rent of approximately \$700,000 per year to the Company and for the Company to pay all operating costs of the facility except for utilities and internal maintenance. The Company's annual rent obligation to the lessor of this facility increases from approximately \$750,000 to \$937,000 during the term of the sub-lease.

The Company leases three retail outlet stores in addition to the store at its distribution facility. These leases terminate between August 1998 and March 2000 and generally require payment of either fixed rent plus a percentage of sales above a pre-determined level or rent based solely on a percentage of sales. Aggregate rental expense for the three retail outlet stores during the fiscal year ended January 31, 1997 was approximately \$153,000.

Leases with provisions for increasing rents have been expensed and accrued on a straight-line basis over the life of the lease.

General

The Company's improved operating results during fiscal 1997 are attributable to its strategic initiatives which have been implemented over the past several years. While sales volume was slightly lower in fiscal 1997 compared to the prior year, gross profit as a percentage of net sales improved as a result of the increase in sales of branded product. Margin improvements were also realized in several of the Company's traditional product lines through more aggressive pricing and more effective sourcing of product.

During fiscal 1996 and fiscal 1997, the Company continued programs, begun in fiscal 1995, to control its expense levels. The Company also carried lower levels of inventory in fiscal 1996 which not only reduced the risks of being required to take markdowns on excess inventory, but also reduced bank borrowings and related interest expense. The Company continued to carry lower inventory levels and reduce its interest expense in fiscal 1997. The ability to operate with lower inventory levels enabled the Company to sublet one of its distribution facilities in March 1996, which reduced warehouse and distribution expenses.

YEAR ENDED JANUARY 31, 1997 ("FISCAL 1997") COMPARED
TO YEAR ENDED JANUARY 31, 1996 ("FISCAL 1996")

Net sales were \$117.6 million in fiscal 1997 compared to \$121.7 million in fiscal 1996. An increase of approximately \$20.5 million in the net sales of the Company's branded product was more than offset by a decrease of approximately \$24.0 million in net sales of the Company's traditional leather and woven product lines.

Gross profit was \$28.5 million in fiscal 1997 compared to \$23.9 million in fiscal 1996. As a percentage of net sales, gross profit was 24.2% in fiscal 1997 compared to 19.6% in fiscal 1996. The increase in the gross profit percentage was the result of increased sales of branded product, which generates higher gross margins, as well as an improvement in the gross margin for several of the Company's traditional product lines.

Selling, general and administrative expenses were \$22.4 million in fiscal 1997 compared to \$21.8 million in fiscal 1996. As a percentage of net sales, selling, general and administrative expenses were 19.1% in fiscal 1997 compared to 17.9% in fiscal 1996. The increase in selling, general and administrative expenses is primarily attributable to costs incurred in connection with the start-up of new divisions (\$829,000), an increase in compensation expense (\$400,000), higher professional fees, primarily consultants assisting the Company with strategic planning (\$360,000) and higher overseas travel costs (\$279,000). These increases were offset in part by lower bad debt expenses due to lower receivable write-offs and recoveries on certain receivables previously written off (\$700,000) and reduced distribution facility costs as a result of subleasing one of the Company's distribution facilities in March 1996 (\$582,000).

Interest expenses was \$2.1 million in fiscal 1997 compared to \$2.4 million in fiscal 1996. This decrease is attributable to lower bank debt balances as the result of lower inventory levels maintained during fiscal 1997.

As a result of the foregoing, the Company realized income before income taxes of \$4.0 million in fiscal 1997 compared to a loss before income taxes of \$308,000 in fiscal 1996.

Income taxes for fiscal 1997 were \$885,000 compared to income taxes of \$89,000 in fiscal 1996 due to foreign income taxes and the resolution of a Federal tax examination. The Company's effective tax rate for fiscal 1997 was 22.3% as a result of tax benefits in the amount of \$1,017,000 attributable to the utilization of state net operating loss carryforwards and deferred tax benefits. The Company expects that such tax benefits will be significantly lower in fiscal 1998.

The Company had net income of \$3.1 million, or \$0.46 per share on a primary basis, in fiscal 1997 compared to a net loss of \$397,000, or \$.06 per share, in fiscal 1996.

YEAR ENDED JANUARY 31, 1996 COMPARED
TO YEAR ENDED JANUARY 31, 1995 ("FISCAL 1995")

Net sales were \$121.7 million in fiscal 1996 compared to \$171.4 million in fiscal 1995. Approximately \$31.3 million of the decrease in net sales in fiscal 1996 was due to the continued weakness in the retail business environment, primarily lower sales of leather outerwear (a decrease of \$16.2 million) and non-leather outerwear (a decrease of \$10.1 million). The balance of the decrease (approximately \$18.4 million) was the result of the Company recognizing only commission income with respect to customer letter of credit transactions, where the Company's customer provided a letter of credit which was transferred by the Company directly to the overseas manufacturer or where the Company's customer provided a letter of credit directly to the overseas manufacturer. Prior to the middle of fiscal 1995, the customer usually provided a letter of credit to the Company and the Company opened a letter of credit to the manufacturer. Accounting rules require the Company to recognize only commission income with respect to transactions where the Company does not open a letter of credit. If the Company had recognized the full amount of sales from customer letter of credit transactions in fiscal 1995 and 1996, net sales would have been \$163.6 million in fiscal 1996 compared to \$195.0 million in fiscal 1995.

Gross profit was \$23.9 million in fiscal 1996 compared to \$25.0 million in fiscal 1995. As a percentage of net sales, gross profit was 19.6% in fiscal 1996 compared to 14.6% in fiscal 1995. While the use of customer letter of credit transactions does not impact gross profit dollars, it does affect gross profit as a percentage of net sales since net revenues recognized from such transactions are lower. Had the Company recognized the full amount of sales from customer letter of credit transactions, gross profit as a percentage of net sales in fiscal 1996 would have been 14.6% compared to 12.8% in fiscal 1995. This increase in the gross profit percentage was a result of improved margins in a majority of product lines, as well as cost

reductions resulting from closure of the Company's domestic manufacturing facilities.

Selling, general and administrative expenses of \$21.8 million in fiscal 1996 were approximately \$4.0 million lower than the \$25.8 million in fiscal 1995. As a percentage of net sales, selling, general and administrative expenses were 17.9% in fiscal 1996 compared to 15.1% in fiscal 1995. This increase as a percentage of net sales was attributable to the lower reported net sales in fiscal 1996. The decrease in selling, general and administrative expenses was the result of the implementation of a cost reduction program which began in the second half of fiscal 1995. This program resulted in reduced expenses from the implementation of a salary reduction for mid-level and senior executives and a reduction in the number of employees (\$1.6 million), consolidating the operations of certain divisions (\$783,000), lower advertising and other marketing expenditures (\$675,000) and lower shipping costs related to lower warehouse volume (\$535,000). The Company will continue to monitor its levels of selling, general and administrative expenses and expects certain increases in these expenses in fiscal 1997 primarily related to the increased offering of licensed product.

The Company recognized \$11.3 million of unusual or non-recurring charges in fiscal 1995. As a result of the unusually warm fall of 1994, which adversely affected the sales of outerwear apparel at the retail level, the Company's receipt of reorders from its customers was below expectations in fiscal 1995. The Company reviewed its inventory levels and salability as of October 31, 1994 and determined that its markdown reserve should be increased by \$5.7 million as of that date. In addition, as the result of lower than expected shipments during the fourth quarter of fiscal 1995, an additional reserve of \$476,000 was provided as of January 31, 1995. In addition, a restructuring reserve of an aggregate of \$5.1 million was established as of January 31, 1995 to provide for the potential loss of the Company's investment in a leather garment factory (\$2.5 million), the write-off of unamortized leasehold fixtures due to the closing of the Company's domestic factory and relocation of its showrooms (\$1.7 million), certain other fixed asset write-offs (\$581,000) and the severance agreement with the Chairman of the Board who retired January 1, 1995 (\$334,000).

Interest expense was \$2.4 million in fiscal 1996 compared to \$4.0 million in fiscal 1995. This decrease is attributable to lower direct bank debt balances as the result of lower inventory levels maintained during fiscal 1996.

As a result of the foregoing, the Company incurred a loss before income taxes of \$308,000 in fiscal 1996 compared to \$16.1 million in fiscal 1995. As discussed above, fiscal 1995 results included nonrecurring or unusual charges of \$11.3 million.

Despite incurring a loss in fiscal 1996, the Company had tax expense of \$89,000 due to foreign income taxes and resolution of a Federal tax examination, compared to a tax benefit of \$4.1 million in fiscal 1995.

The Company incurred a net loss of \$397,000, or \$.06 per share, in fiscal 1996 compared to a net loss of \$11.7 million, or \$1.82 per share, in fiscal 1995.

-20-

LIQUIDITY AND CAPITAL RESOURCES

The Company has a loan agreement, which expires May 31, 1997, providing the Company with a collateralized working capital line of credit with three banks for a maximum amount of \$48 million through October 30, 1996), (reduced to \$40 million after October 30, 1996, of which a maximum of \$40

million (reduced to \$32 million after October 30, 1996) is available for direct borrowing and bankers' acceptances and the unused balance for letters of credit. Amounts available for borrowing are subject to borrowing base formulas and over advances specified in the agreement. Direct borrowings under the line of credit bear interest at the agent bank's prime rate (8.5% as of April 15, 1997) plus 1.75%. The amount borrowed under the line of credit varies based on the Company's seasonal requirements. The Company is in discussions with its banks to extend the loan agreement to May 31, 1999 under terms similar to the existing loan agreement. The maximum amount outstanding (i.e., open letters of credit, bankers acceptances and direct borrowings) under the Company's loan agreement was approximately \$63.0 million, \$46.7 million and \$44.9 million during fiscal 1995, 1996 and 1997, respectively. As of January 31, 1997, there were no outstanding direct borrowings, no bankers' acceptances and \$4.8 million of contingent liability under open letters of credit, as compared to no outstanding direct borrowings, no bankers' acceptances and \$4.1 million of contingent liability under open letters of credit as of January 31, 1996. The Company carried lower levels of inventory in fiscal 1997 and fiscal 1996 compared to fiscal 1995 and, as a result, its borrowing requirements were lower in these years.

In recognition of the highly seasonal nature of the Company's business, the Company's loan agreement provides for certain loan overadvances in excess of the borrowing base formulas. As a result of the Company's outstanding borrowings exceeding the permitted overadvance levels, during fiscal 1995 and 1996, the Company's two principal stockholders jointly and severally guaranteed up to \$2.5 million of the Company's line of credit obligations. In addition, one of the principal stockholders has pledged 250,000 shares of Common Stock as additional security for the loan agreement. It is expected that the provisions of the extended loan agreement will not require either the personal guaranty or the pledge of stock by the principal stockholders.

The Company's wholly owned Indonesian subsidiary has a line of credit with a bank for approximately \$3.5 million which is supported by a \$2.0 million stand-by letter of credit issued under the Company's domestic credit facility. As of January 31, 1997, the borrowing by the Indonesian subsidiary under its line of credit approximated \$3.5 million.

Historically, the Company's business has not required significant capital expenditures. The Company's capital expenditures were approximately \$902,000 and \$507,000 for fiscal 1996 and 1997, respectively. Capital expenditures were used primarily for additional computer upgrades, leasehold improvements and furniture, fixtures and equipment in fiscal 1996 and 1997.

-21-

IMPACT OF INFLATION AND FOREIGN EXCHANGE

The results of operations of the Company for the periods discussed have not been significantly affected by inflation or foreign currency fluctuation. The Company negotiates its purchase orders with its foreign manufacturers in United States dollars. Thus, notwithstanding any fluctuation in foreign currencies, the Company's cost for any purchase order is not subject to change after the time the order is placed. However, if the value of the United States dollar against local currencies was to go down, certain manufacturers might increase their United States dollar prices for products.

FUTURE EFFECTS OF RECENTLY ISSUED ACCOUNTING PRONOUNCEMENTS

The Financial Accounting Standards Board has issued Statement of Financial Accounting Standards No. 128, "Earnings Per Share," which is effective for financial statements issued after December 15, 1997. Early adoption of the new standard is not permitted. The new standard eliminates primary and fully diluted earnings per share and requires presentation of basic and diluted

earnings per share together with disclosure of how the per share amounts were computed. The effect of adopting this new standard has not been determined.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

January 31, 1995, 1996 and 1997

NOTE A - SIGNIFICANT ACCOUNTING POLICIES

A summary of the significant accounting policies consistently applied in the preparation of the accompanying consolidated financial statements follows:

1. Business Activity and Principles of Consolidation

As used in these financial statements, the term "Company" refers to G-III Apparel Group, Ltd. and its wholly-owned subsidiaries. The Company designs, manufactures, imports and markets an extensive range of leather and textile apparel which is sold to retailers throughout the United States.

The Company consolidates the accounts of all its wholly-owned subsidiaries. All material intercompany balances and transactions have been eliminated.

2. Use of Estimates

In preparing financial statements in conformity with generally accepted accounting principles, management is required to make estimates and assumptions that affect the reported amounts of assets and liabilities, the disclosure of contingent assets and liabilities at the date of the financial statements, and the reported amounts of revenues and expenses during the reporting period. Actual results could differ from those estimates.

3. Joint Venture

In fiscal 1995, the Company entered into a joint venture agreement with a Chinese entity principally to operate a factory located in the People's Republic of China. The Company invested \$542,000 to obtain a 39% interest in the joint venture company. The joint venture company has an initial term of twenty years and proposes to distribute profits, if any, annually. The Company accounts for joint venture operations, which are not material, using the equity method of accounting.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (CONTINUED)

January 31, 1995, 1996 and 1997

NOTE A (CONTINUED)

4. Revenue Recognition

Sales are recognized when merchandise is shipped.

5. Inventories

Inventories are stated at the lower of cost (determined by the first-in, first-out method) or market.

6. Depreciation and Amortization

Depreciation and amortization are provided by straight-line methods in amounts sufficient to relate the cost of depreciable assets to operations over their estimated service lives.

The following are the estimated lives of the Company's fixed assets:

Machinery and equipment	5 to 7 years
Transportation equipment	5 years
Furniture and fixtures	5 years
Computer equipment	3 to 5 years
Building	20 years

Leasehold improvements are amortized over the lives of the respective leases or the service lives of the improvements, whichever is shorter.

The Company annually evaluates the carrying value of its long-lived assets to evaluate whether changes have occurred that would suggest that the carrying amount of such assets may not be recoverable based on the estimated future undiscounted cash flows of the businesses to which the assets relate. Any impairment loss would be equal to the amount by which the carrying value of the assets exceeded its fair value.

7. Income Taxes

Deferred income tax assets reflect the tax effects of temporary differences between the carrying amounts of assets and liabilities for financial reporting purposes and the amounts used for income tax purposes.

January 31, 1995, 1996 and 1997

NOTE A (CONTINUED)

8. Cash Equivalents

The Company considers all highly liquid debt instruments purchased with a maturity of three months or less to be cash equivalents.

9. Net Income (Loss) Per Common Share

Net income (loss) per share of common stock is based on the weighted average number of common shares outstanding during each of the periods, adjusted for the dilutive effect of common stock equivalents, when applicable.

10. Stock-Based Compensation

The Company grants stock options for a fixed number of shares to employees and directors with an exercise price equal to or greater than the fair value of the shares at the date of grant. The Company has adopted the disclosure-only provision of SFAS No. 123, "Accounting for Stock-Based Compensation," which permits the Company to account for stock option grants in accordance with APB Opinion No. 25, "Accounting

for Stock Issued to Employees." Accordingly, the Company recognizes no compensation expense for the stock option grants.

11. Fair Value of Financial Instruments

Based on borrowing rates currently available to the Company for bank loans with similar terms and maturities, the fair value of the Company's short-term debt approximates the carrying value. Furthermore, the carrying value of all other financial instruments potentially subject to valuation risk (principally consisting of cash, accounts receivable and accounts payable) also approximates fair value.

12. Foreign Currency Translation

The financial statements of subsidiaries outside the United States are generally measured using the local currency as the functional currency. Assets and liabilities are translated at the rates of exchange at the balance sheet date. Income and expense items are translated at average monthly rates of exchange. Gains and losses from foreign currency transactions of these subsidiaries are included in net earnings.

NOTE B - NONRECURRING OR UNUSUAL CHARGES

During the fourth quarter of fiscal year 1995, the Company formulated plans to close its domestic manufacturing facility, to sell or liquidate an Asian factory, to reduce costs and to streamline and consolidate operations. Lost revenues from these closings are not considered significant. In addition, due to the unseasonably warm fall and winter in the United States, the Company recorded significant write-downs of its inventory. These activities resulted in nonrecurring or unusual charges of \$11.3 million, of which \$5.6 million was recorded in the fourth quarter of 1995. The Company has not anticipated any recoveries through the sale or liquidation of its Asian factory. Such recoveries could reduce the accrued charges in the future; however, the Company cannot be assured that any such recoveries will occur. Based on current estimates, management believes that existing accruals are adequate to cover the items presented below.

The status of the components of the nonrecurring charge was:

NOTE E - NOTES PAYABLE

Notes payable represent foreign notes payable by PT Baliuhides, the Company's Indonesian subsidiary. These notes payable represent borrowings under a line of credit of approximately \$3.5 million with an Indonesian bank. This is supported by a \$2 million stand-by letter of credit issued under the Company's domestic line of credit. Due to the history of operating losses experienced by PT Baliuhides and the Company's evaluation of the economic benefits to continue to operate this facility, the Company has provided for the standby letter of credit as part of its accrued nonrecurring charges (Note B).

G-III Apparel Group, Ltd. and Subsidiaries

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (CONTINUED)

January 31, 1995, 1996 and 1997

NOTE E (CONTINUED)

The Company has a domestic loan agreement with three banks which expires on May 31, 1997. The agreement provides for \$48,000,000 in borrowings through October 30, 1996, and \$40,000,000 through May 31, 1997, of which \$32,000,000 is available for direct borrowings and the unused balance for letters of credit. All amounts available for borrowing are subject to borrowing base formulas.

All borrowings under the agreement are payable on demand and bear interest at the prevailing prime rate (8.5% at April 14, 1997), plus 1.75%, and are collateralized by the assets of the Company. The principal stockholders of the Company have issued a personal guarantee for a portion of the borrowings. In addition, the President of the Company has pledged 250,000 of his shares of the Company's common stock as collateral. The loan agreement requires the Company, among other covenants, to maintain certain earnings and tangible net worth levels, and prohibits the payment of cash dividends.

The Company is currently in discussions with its banks to extend its existing loan agreement through May 31, 1999 under terms similar to the existing agreement.

The weighted average interest rates were 10.36% and 10.03% as of January 31, 1996 and 1997, respectively.

At January 31, 1996 and 1997, the Company was contingently liable under letters of credit in the amount of approximately \$4,100,000 and \$4,800,000, respectively.

NOTE F - CAPITAL LEASE OBLIGATIONS

In September 1986, the New York City Industrial Development Agency ("Agency") issued \$1,442,000 of floating rate Industrial Development Revenue Bonds to a commercial bank for the purpose of acquiring and renovating real property located at 345 West 37th Street in New York. The bonds bear interest at 92% of the bank's prime rate, which was of 8.25% at January 31, 1997 plus 1.48% per annum. Simultaneously, the Agency leased the property to 345 West 37th Corp. ("345 West"), a company under the management and control of two principal stockholders, for 15 years. 345 West, in turn, subleased the property to G-III Leather Fashions, Inc. ("G-III"), a subsidiary of

the Company, on the same terms. Concurrent with the execution of the lease and sublease agreements, 345 West and G-III entered into lease guarantee agreements whereby they jointly and severally guaranteed the payments and obligations under the lease and the payment of principal and interest on the bonds. In addition, the two principal stockholders of the Company have personally guaranteed the debt. The accompanying financial statements reflect the above lease between G-III and 345 West as a capitalized lease

(Note K).

In fiscal 1995, the Company entered into several agreements for the sale and leaseback of the renovations of its showroom and warehouse and the computer system installed for the retail stores. The assets were sold for \$1,548,000 (the book value of the assets). The sales and leaseback transactions have been accounted for as a capital lease, wherein the property remains on the books and will continue to be depreciated. A financing obligation representing the proceeds has been recorded. The Company has the option to purchase these assets at the end of the leases.

In addition, certain equipment leases have been treated as capital leases. The present values of minimum future obligations are calculated based on interest rates at the inception of the leases. The following schedule sets forth the future minimum lease payments under capital leases at January 1997:

During the year ended January 31, 1997, the valuation allowance decreased by approximately \$912,000. Due to changes in economic circumstances, the Company has assessed its past earnings history and trends and has evaluated its anticipated profitability over the period of years in which the temporary differences are expected to become tax deductions. Management has reduced the allowance to an amount at which it believes sufficient taxable income will be generated to realize the net deferred tax assets. The Company has state and local net operating loss carryforwards of \$6,400,000, which will be available to offset its earnings during the carryforward period. If not used, these carryforwards begin to expire in 2010.

The agreement provides for a base salary and bonus payments that vary between 3% and 6% of pretax income in excess \$2 million. NOTE I (CONTINUED)

During the 1995 fiscal year, in connection with the chief executive officer's employment agreement, the Company granted options to purchase 100,000 shares of common stock at \$4.00 per share exercisable over a ten-year period. The options vest over a five-year period beginning February 1, 1995. In December 1994, the Company repriced the outstanding options to \$2.00 per share, the current market value at the date of repricing.

In addition, during the 1995 fiscal year, the Company granted 50,000 options to its principal stockholders in consideration for certain agreements made

by the principal stockholders with the Company's banks. At the time of issuance, the options were exercisable at a higher price than the current market price. Half of the options are exercisable at \$5.50 per share; the balance of the options are exercisable at \$6.50 per share. In December 1994, the Company repriced the outstanding options to \$2.00 per share, the current market value at the date of repricing.

The Company has adopted the disclosure-only provisions of SFAS No. 123, "Accounting for Stock Based Compensation." Accordingly, no compensation cost has been recognized for the stock options granted to employees and directors. Had compensation cost been determined based on the fair value at the grant date for stock option awards in 1996 and 1997 consistent with the provisions of SFAS No. 123, the Company's net loss would have been increased by approximately \$19,000 and the net loss per share would remain unchanged for the year ended January 31, 1996. Net income and earnings per share for the year ended January 31, 1997 would have been decreased by approximately \$262,000 or \$.04 per share, respectively. During the initial phase-in period of SFAS No. 123, such compensation may not be representative of the future effects of applying this statement.

Members pro rata in accordance with their Sharing Ratios in effect for the period during which such items accrue. For purposes of computing the amount of each item of income, gain, deduction or loss, the determination, recognition and classification of such item shall be the same as its determination, recognition and classification for federal income tax purposes, unless otherwise required by Section 704(b) of the Code.

(b) Except to the extent such item is subject to allocation under Section 704(c) of the Code or Section 704(c) principles as contemplated under Section 704(b) of the Code, each item of income, gain, loss, deduction and credit, as determined for federal and other income tax purposes, shall be allocated in the same manner as such item was allocated under Section 5.1(a), above.

(c) All items of income, gain, loss, deduction and credit allocable to any Membership Interest that may have been transferred shall be allocated between the transferor and the transferee based on the portion of the calendar year during which each was recognized as owning that Membership Interest, without regard to the results of Company operations during any particular portion of that calendar year and without regard to whether cash distributions were made to the transferor or the transferee during that calendar year; provided, however, that this allocation must be made in accordance with a method permissible under Section 706 of the Code and the regulations thereunder.

5.2 DISTRIBUTIONS. From time to time (but at least once each Fiscal Year) the Board of Managers shall determine in its reasonable judgment to what

extent (if any) the Company's cash on hand exceeds its current and anticipated needs, including for operating expenses, debt service, acquisitions and a reasonable contingency reserve. If the Board of Managers determines that an excess exists, the Board of Managers shall direct the Company to make a distribution to the Members, in accordance with their Sharing Ratios, in an amount in cash equal to that excess.

ARTICLE VI
MANAGEMENT

6.1. BOARD OF MANAGERS. (a) Except as provided in Article VII hereof, the business and affairs of the Company shall be managed under the direction of the Board of Managers (the "Board"), and the Board shall have all power and authority to manage, and direct the management and the business and affairs of, the Company. Any power not delegated pursuant to a policy of delegation adopted by the Board shall remain with the Board. Approval by or action taken by the Board in accordance with this Agreement shall constitute approval or action by the Company and shall be binding on the Members.

(b) The Board shall at all times consist of six members (individually referred to as a "Manager"), three of whom shall be appointed by G-III and three of whom shall be appointed by BET. Each Manager shall serve until the earlier of his replacement by election, resignation, removal, death, or inability to serve. Any Manager may resign at any time upon written notice to the Company. Notice of meetings may be waived before or after a meeting by a written waiver of notice signed by the Manager entitled to notice. Each Member of the Board may vote by delivering his proxy to another Manager. The Board may act without a meeting if the action taken is approved in advance in writing by the unanimous consent of all Managers. The Board shall cause written minutes to be prepared of all action taken by the Board and shall cause a copy thereof to be delivered to each Manager within 15 days thereafter.

6.4. AUTHORITY OF THE BOARD OF MANAGERS. Unless otherwise provided for in this Agreement, the Board, by its own action or by action of a subcommittee

of the Board, but not by delegation to officers or other employees of the Company, shall, in addition to any other power granted to it in this Agreement, have the right, power and authority to take the following actions and no such action will be taken without the Unanimous Approval of the Board:

In managing the business affairs of the Company, G-III shall be required to: (i) provide all accounting, credit, collections, accounts payable, accounts receivable, cash management, systems administration, management information systems, human resources, import/export and other "back office" services (collectively, the "Business Affairs Services") required by the Company;

-11-

and (ii) make available such G-III personnel as shall be reasonably necessary to provide the Business Affairs Services.

(b) G-III is entitled to receive a fee (the "Management Fee") from the Company in an amount equal to six percent (6%) of the net sales (determined in accordance with generally accepted accounting principles) of the Company for providing the Business Affairs Services; provided, however, that if the

Allocable Expenses (as hereinafter defined) in connection with G-III's providing the Business Affairs Services to the Company during any Annual Period (as hereinafter defined) during the term of this Agreement shall be an amount less than six percent (6%) of net sales during such Annual Period, G-III shall repay such deficiency to the Company within thirty days of the determination of such amount. For the purposes of this Section 7.1, (i) "Allocable Expenses" shall be based on G-III's costs for providing Business Affairs Services to all of its divisions, including the Company, and the Allocable Expenses to the Company shall be determined in accordance with G-III's accounting and allocation procedures utilized in preparing internal financial statements for G-III's divisions and (ii) "Annual Period" shall mean the period from the date hereof through January 31, 1999 and each twelve-month period thereafter; provided, however, that if this Agreement terminates on a date other than January 31, the final Annual Period shall end on such date of termination. Except as otherwise provided by the Act, the debts, obligations and liabilities of the Company, whether arising in contract, tort or otherwise, shall be solely the debts, obligations and liabilities of the Company, and no Covered Person shall be obligated personally for any such debt, obligation or liability of the Company solely by reason of being a Covered Person.

8.2 EXCULPATION.

(a) No Covered Person shall be liable to the Company or any other Covered Person under any theory of law, including tort, contract or otherwise, including a Covered Person's own negligence, for any loss, damage or claim incurred by reason of any act or omission (including decisions to vote for or against any matter) performed or omitted by such Covered Person in good faith on behalf of the Company and in a manner reasonably believed to be within the scope of authority conferred on such Covered Person by this Agreement, except

-12-

that a Covered Person shall be liable for any such loss, damage or claim incurred by reason of such Covered Person's gross negligence or willful misconduct.

(b) A Covered Person shall be fully protected in relying in good faith upon the records of the Company and upon such information, opinions, reports or statements presented to the Company by any Person as to matters the Covered Person reasonably believes are within such other Person's professional or expert competence and who has been selected with reasonable care by or on behalf of the Company, including information, opinions, reports or statements as to the value and amount of the assets, liabilities, profits, losses, or any other facts pertinent to the existence and amount of assets from which distributions to Members might properly be paid.

8.3 DUTIES AND LIABILITIES OF COVERED PERSONS.

(a) To the extent that, at law or in equity, a Covered Person has

duties (including fiduciary duties) and liabilities relating thereto to the Company or to any other Covered Person arising under this Agreement, a Covered Person acting under this Agreement shall not be liable to the Company or to any other Covered Person for actions (including decisions to vote for or against any matter) taken by it in good faith reliance on the provisions of this Agreement. The provisions of this Agreement, to the extent that they restrict the duties and liabilities of a Covered Person otherwise existing at law or in equity, are agreed by the parties hereto to replace such other duties and liabilities of such Covered Person.

(b) Unless otherwise expressly provided herein, (i) whenever a conflict of interest exists or arises between Covered Persons, or (ii) whenever this Agreement or any other agreement contemplated herein or therein provides that a Covered Person shall act in a manner that is, or provides terms that are, fair and reasonable to the Company or any Member, the Covered Person shall disclose such conflict or action to the Board and shall resolve such conflict of interest (subject to any Member or Board approvals required pursuant to this Agreement), taking such action or providing such terms, considering in each case the relative interest of each party (including its own interest) to such conflict, agreement, transaction or situation and the benefits and burdens relating to such interests, any customary or accepted industry practices, and any applicable generally accepted accounting practices or principles. In the absence of bad faith by the Covered Person, the resolution, action or term so made, taken or provided by the Covered Person shall not constitute a breach of this Agreement or any other agreement contemplated herein or of any duty or obligation of the Covered Person at law or in equity or otherwise.

(c) Whenever in this Agreement a Covered Person is permitted or required to make a decision (i) in its "discretion" or under a grant of similar authority or latitude, the Covered Person shall be entitled to consider only such interests and factors as it desires, including its own interests, and shall have no duty or obligation to give any consideration to any interest of or factors affecting

-13-

the Company or any other Person, or (ii) in its "good faith" or under another express standard, the Covered Person shall act under such express standard and shall not be subject to any other or different standard imposed by this Agreement or other applicable law.

9.2 EXPENSES. To the fullest extent permitted by applicable law, expenses (including legal fees) incurred by a Covered Person in defending any

claim, demand, action, suit or proceeding for which indemnity is sought under this Agreement shall, from time to time, be advanced by the Company prior to the final disposition of such claim, demand, action, suit or proceeding upon receipt by the Company of an undertaking by or on behalf of the Covered Person to repay such amount if it shall be determined that the Covered Person is not entitled to be indemnified as authorized in Section 9.1 hereof.

9.3 INSURANCE. The Company may purchase and maintain insurance, to the extent and in such amounts as the Board shall deem reasonable, on behalf of Covered Persons and such other Persons as the Board shall determine, against any liability that may be asserted against or expenses that may be incurred by any such Person in connection with the activities of the Company or such indemnities, regardless of whether the Company would have the power to indemnify such Person against such liability under the provisions of this Agreement. The Company may enter into indemnity contracts with Covered Persons and adopt written procedures pursuant to which arrangements are made for the advancement of expenses and the funding of obligations under Section 9.2 hereof and containing such other procedures regarding indemnification as are appropriate.
